GCTE-COST Workshop
LITTER QUALITY AND DECOMPOSITION UNDER ELEVATED ATMOSPHERIC CO_2

Capri, Italy, 24–27 September, 1998

Guest editors:
Josep Canadell, Richard Norby, Francesca Cotrufo, Josef Nösberger

Preface **v–vi**

The effects of elevated [CO_2] on the C:N and C:P mass ratios of plant tissues
R.M. Gifford, D.J. Barrett and J.L. Lutze **1–14**

Nitrogen resorption in senescing tree leaves in a warmer, CO_2-enriched atmosphere
R.J. Norby, T.M. Long, J.S. Hartz-Rubin and E.G. O'Neill **15–29**

Litter quality and decomposition in a CO_2-enriched Mediterranean forest ecosystem
P. De Angelis, K.S. Chigwerewe and G.E. Scarascia Mugnozza **31–41**

Due to symbiotic N_2 fixation, five years of elevated atmospheric pCO_2 had no effect on the N concentration of plant litter in fertile, mixed grassland
U.A. Hartwig, A. Lüscher, M. Daepp, H. Blum, J.-F. Soussana and J. Nösberger **43–50**

Does elevated atmospheric CO_2 concentrations affect wood decomposition?
M. Francesca Cotrufo and P. Ineson **51–57**

Review of elevated atmospheric CO_2 effects on agro-ecosystems: residue decomposition processes and soil C storage
H.A. Torbert, S.A. Prior, H.H. Rogers and C.W. Wood **59–73**

Decomposition of leaf and root tissue of three perennial grass species grown at two levels of atmospheric CO_2 and N supply
A. Gorissen and M.F. Cotrufo **75–84**

Long-term effects of elevated atmospheric CO_2 on below-ground biomass and transformations to soil organic matter in grassland
J.D. Jastrow, R.M. Miller and C.E. Owensby **85–97**

Effects of [CO_2] and nitrogen fertilization on soils planted with ponderosa pine
D.W. Johnson, W. Cheng and J.T. Ball **99–113**

Effects of CO_2 and N fertilization on decomposition and N immobilization in ponderosa pine litter
D.W. Johnson, W. Cheng and J.T. Ball **115–122**

Interactions between atmospheric CO_2 enrichment and soil fauna
M.-M. Coûteaux and T. Bolger **123–134**

Effects of elevated [CO_2] on forest growth and carbon storage: a modelling analysis of the consequences of changes in litter quality/quantity and root exudation
R.E. McMurtrie, R.C. Dewar, B.E. Medlyn and M.P. Jeffreys **135–152**

Dynamics of mineral N availability in grassland ecosystems under increased [CO_2]: hypotheses evaluated using the Hurley Pasture Model
J.H.M. Thornley and M.G.R. Cannell **153–170**

Volume 224 No. 2

Phenotypic characteristics of root-nodulating bacteria isolated from *Acacia* spp. grown in Libya
S.H. Mohamed, A. Smouni, M. Neyra, D. Kharchaf and A. Filali-Maltouf **171–183**

Patterns of nitrogen conservation in shrubs and grasses in the Patagonian Monte, Argentina
A.L. Carrera, C.L. Sain and M.B. Bertiller **185–193**

The spatial distribution of soil hyphae in structured spruce-forest soils
H. Schack-Kirchner, K.V. Wilpert and E.E. Hildebrand **195–205**

The effects of nutrient supply, predominantly addition of iron, and rhizobial inoculation on the tolerance of *Lupinus pilosus* genotypes to a calcareous soil
J.D. Brand, C.T. Tang and R.D. Graham **207–215**

Plant diversity effects on soil heterotrophic activity in experimental grassland ecosystems
E.M. Spehn, J. Joshi, B. Schmid, J. Alphei and C. Körner **217–230**

Key processes of the nitrogen cycle in an irrigated and a non-irrigated grazed pasture
N. Pakrou and P. Dillon **231–250**

Phytoextraction of selenium from soils irrigated with selenium-laden effluent
G.S. Bañuelos, S. Zambrzuski and B. Mackey **251–258**

Growth analysis of maize field crops under phosphorus deficiency. II. Radiation-use efficiency, biomass accumulation and yield components
D. Plénet, A. Mollier and S. Pellerin **259–272**

Responses of N fluxes and pools to elevated atmospheric CO_2 in model forest ecosystems with acidic and calcareous soils
F. Hagedorn, J.B. Bucher, D. Tarjan, P. Rusert and I. Bucher-Wallin **273–286**

Nitrogen fertilizer replacement indexes of legume cover crops in the derived savanna of West Africa
G. Tian, G.O. Kolawole, B.T. Kang and G. Kirchhof **287–296**

Effect of wet and dry cycles in calcareous soil on mineral nutrient uptake of two grasses, *Agrostis stolonifera* L. and *Festuca ovina* L.
A. Misra and G. Tyler **297–303**

Volume Contents **305–307**

Author index **309**

Instructions for authors **311–317**
